

All ALC E-Learners with Brevard Schools Laptops

All Passwords have to be changed at are set to a time element.

This means your Password will change on the machine(laptops) you are using as well as in LAUNCHPAD when this time expires.

How we fix this is easy.

1. Go back to the school you received the machine from and redo your password.

A. This only has to be done if your password has expired or is about to be expired.

B. You may be able to change your Password at any Brevard School site if it ***allows you PRIOR to the expiration*** of the Password and you still can log-in, on the Wi-Fi (BPSWIRELESS).

C. You can sit in the parking lot of the ALC's North and South and change it there, if not you will need to go into the school and do it at the front desk.

D. Remember once the Password is changed, write it down so not forget it, Change it in Launchpad.

Thank You for your Hard Work and Time.

BPS Tech staff.
