## Melbourne High School

---

Offering International Baccalaureate Diploma Programme and Career-related Programme Academy – prepared for life.

## What is the IB Career Program at MHS?

The IB Career Program is an opportunity for students to earn an industry certification and graduate high school prepared for career, college, or other life path. Engaging in meaningful community service and research relevant to the career field, students learn to think, collaborate, question, and determine outcomes based on their personal goals and interests.

### What makes the Career Program unique?

- Integrates academic and practical learning
- Develop essential skills
- Use current technology
- Earn Industry Certification
- Internships

*"For students who want to complement traditional learning with the practicality of career-based studies, the IB career-related program could be a good option. Few educational programs offer the invaluable combination of the theoretical knowledge and real-world application." US News and World Report*

## International Baccalaureate World School

### What is an IB education?

IB curriculum develops student abilities as inquirers, thinkers, communicators, and encourages them to be knowledgeable, principled, open minded, caring, risk-takers, balanced, and reflective. These attributes represent a broad range of human capacities and responsibilities that go beyond intellectual development and academic success. This is the IB's educational philosophy. Prepare your child for life beyond graduation through relevant course study and meaningful classroom engagement.

The International Baccalaureate Diploma Programme and Career-related Programme are Brevard Public Schools Choice Programs offered at Melbourne High School. Students zoned for schools other than Melbourne High School may apply for either IB program by completing an EPO application on the BPS district web site.

## What is the IB Diploma Program at MHS?

In preparation for university and beyond, students in the Diploma Programme (DP) develop a breadth and depth of knowledge needed to flourish as creative problem-solvers and lifelong independent thinkers

The Diploma Program is uniquely designed four year program to support all students' potential for success going into, and throughout, university. The DP is offered at many schools across the world. DP graduates are well-equipped to adjust, engage and succeed in college and career. Students graduate high school with analytical, writing, communication and presentation skills; research experience; excellent organization and time management; the ability to approach a topic from multiple perspectives; and a deep understanding of academic concepts.

*"One of the advantages of an IB curriculum is its structure and quality. It is a coordinated program, well established, well known and well respected. We know the quality of IB courses, and we think the IB curriculum is terrific." Duke University, Christoph Guttentag, Director of Undergraduate Admissions*
