

Mrs. Villanueva's At Home Music Exploration!

Lesson 1: Find 3 things in your house that could SAFELY work as an instrument. Sing your favorite song while you keep a STEADY BEAT on your newly created instrument. Include your siblings or family for a group project! Record it if you want and share the video with me at Villanueva.rebekah@brevardschools.org !

Lesson 2: Choose your favorite song (even if it has no words). Change or create new lyrics to your song that make it relevant to you (maybe the stuck at home blues!) For example, we studied Beethoven's 5th this year (duh duh duh duh) so it could be. I am so bored, stuck in my house... etc. Write down your words, or record yourself singing it!

Lesson 3: Record yourself singing a song. Add dance movements to the song! Make sure you use at least 3 different moves and repeat them in a pattern. Record it and share it if you want!

Lesson 4: Listen outside to the sounds of your neighborhood. What sounds make natural music to your ears? List or tell someone why you chose those sounds!

Lesson 5: Think about your favorite musical artist (Singer, DJ, rapper, or instrumentalist). What makes them your favorite? Write a sentence about why you enjoy that person/group.

Lesson 6: Pick 2 things that could be instruments in your house. Find a partner. While one person plays a steady beat, have the other make up a "tricky" rhythm so they make music together.

Lesson 7: Find a partner and play the "simon" rhythm game. Person 1 claps a rhythm, person 2 copies the rhythm and makes it longer. Person 1 copies the rhythm and makes it longer! Continue until someone makes a mistake and you start over with a new rhythm!
