

What has the Space Program done for you????

Did you know that the items below are spin-offs of NASA's Space Program?

Look for more spin-offs when you visit Kennedy Space Center.

Artificial Heart from the Space Shuttle fuel pumps.

Auto Insulation from the shuttle thermal protection.

CAT Scanner and MRI from computer pictures of the moon.

Car Racers Cool Suits from Apollo astronauts.

Cordless Power Tools from tools in space.

Diagnostic Lab Instruments from space experimentation.

Dialysis Machines from chemical waste removal technology.

Freeze-dried Food from Apollo missions.

Gas Detector from the Shuttle's fuel system.

Infrared Camera from Shuttle program.

Infrared Thermometer from measuring temp. of

Mylar balloons from space suit insulation and satellite reflection.

Jewelry Design Soldering Bases from Shuttle heat tiles.

Land Mine Removal Device from Shuttle rocket fuel.

Light Treatment Chemotherapy from shuttle plant labs.

Artificial Limb Material from Shuttle heat tank insulation.

Rescue Tool from tool to separate devices on the Shuttle.

Shock-absorbing sneakers from moon boots.

Fog-free Goggles from space helmet face mask.

Sports Helmets from astronaut helmets.

Water Purification from Apollo flights.
